

一、中英文主旨

中文主旨

文章引用政治家埃德蒙·伯克的名言，点明动物权利活动正试图叫停生物医学研究、误导大众从而阻碍医疗进步的现状，分析了动物权利组织瞄准生物医学研究的原因，用实例展现普通民众对动物实验的认知误区，进而向科研人员提出面向公众通俗科普、开展校园宣讲、开放实验室、动员患者群体等一系列应对举措，最后警示若有识之士不作为，医学进步的火种将被无知民众扑灭。

英文主旨

By quoting Edmund Burke's words, the passage reveals that animal rights activists are trying to ban biomedical research, confuse the public and hinder advances in medical care. It analyzes why animal rights groups target biomedical research, presents a typical example of public misunderstanding of animal research, offers feasible solutions for scientists and research organizations to fight against misleading information, and warns that uninformed citizens may put an end to medical progress if responsible people remain inactive.

三、原文完整复述 (与原图分段格式一致)

To paraphrase 18th-century statesman Edmund Burke, “all that is needed for the triumph of a misguided cause is that good people do nothing.” One such cause now seeks to end biomedical research because of the theory that animals have rights ruling out their use in research. Scientists need to respond forcefully to animal rights advocates, whose arguments are confusing the public and thereby threatening advances in health knowledge and care. Leaders of the animal rights movement target biomedical research because it depends on public funding, and few people understand the process of health care research. Hearing allegations of cruelty to animals in research settings, many are perplexed that anyone would deliberately harm an animal.

For example, a grandmotherly woman staffing an animal rights booth at a recent street fair was distributing a brochure that encouraged readers not to use anything that comes from or is tested in animals—no meat, no fur, no medicines. Asked if she opposed immunizations, she wanted to know if vaccines come from animal research. When assured that they do, she replied, “Then I would have to say yes.” Asked what will happen when epidemics return, she said, “Don’t worry, scientists will find some way of using computers.” Such well-meaning people just don’t understand.

Scientists must communicate their message to the public in a compassionate, understandable way in human terms, not in the language of molecular biology. We need to make clear the connection between animal research and a grandmother’s hip replacement, a father’s bypass operation, a baby’s vaccinations, and even a pet’s shots. To those who are unaware that animal research was needed to produce these treatments, as well as new treatments and vaccines, animal research seems wasteful at best and cruel at worst.

Much can be done. Scientists could “adopt” middle school classes and present their own research. They should be quick to respond to letters to the editor, lest animal rights misinformation go unchallenged and acquire a deceptive appearance of truth. Research institutions could be opened to tours, to show that laboratory animals receive humane care. Finally, because the ultimate stakeholders are patients, the health research community should actively recruit to its cause not only well-known personalities such as Stephen Cooper, who has made courageous statements about the value of animal research, but all who receive medical treatment. If good people do nothing, there is a real possibility that an uninformed citizenry will extinguish the precious embers of medical progress.

四、全文完整中文翻译

套用18世纪政治家埃德蒙·伯克的话来说：“一项被误导的事业想要得逞，只需要好人袖手旁观。”如今就有这样一项事业，它试图叫停生物医学研究，其依据的理论是动物拥有权利，因此不能将动物用于科研。科学家需要有力回击动物权利倡导者，这些人的言论正在迷惑公众，进而威胁医疗知识与诊疗服务的发展。动物权利运动的领袖之所以将矛头对准生物医学研究，是因为这类研究依赖公共资金扶持，而很少有人了解医疗研究的运作流程。当人们听到科研场景存在虐待动物的指控时，大多都会感到困惑：怎么会有人刻意伤害动物？

举个例子，在近期一场街头集市上，一位在动物权利宣传摊位值守的慈祥老妇人正在分发宣传册，册子呼吁读者不要使用任何来自动物或经过动物测试的产品：不吃肉类、不穿皮草、不使用相关药物。当被问及是否反对疫苗接种时，她反倒先询问疫苗是否依托动物实验研发。得到肯定的答复后，她回应：“那我就必须说我反对接种。”当被问到流行病卷土重来该怎么办时，她说：“不用担心，科学家会想出用计算机替代的办法。”这类出发点善意的人，只是根本不了解背后的实情。

科学家必须用富有同理心、普通人能听懂的通俗方式向大众传递信息，而不是使用分子生物学的专业术语。我们要讲清楚动物实验和日常生活医疗成果的关联：祖母的髌关节置换手术、父亲的心脏搭桥手术、婴儿的疫苗接种，甚至宠物的防疫注射，全都离不开动物实验。有些人不知道现有疗法、新疗法以及疫苗的研发都需要动物实验支撑，在他们眼里，动物实验往轻了说是资源浪费，往重了说就是残忍暴行。

我们可以落实很多可行举措。科学家可以“定点对接”中学课堂，向学生展示自己的研究成果；要及时回复报刊的读者来信，避免动物权利相关的错误信息无人反驳、最终伪装出真实可信的模样；科研机构可以向公众开放参观，展示实验动物都得到了人道照料。最后，由于最终的利益相关者是患者，医疗科研圈应当积极为自身事业争取支持：不仅要团结斯蒂芬·库珀这类曾勇敢发声肯定动物实验价值的知名人士，还要动员所有接受过医疗救治的普通民众。如果有良知的人选择不作为，缺乏相关认知的民众真的有可能扑灭医学进步来之不易的珍贵星火。
