一、中英文主旨

中文主旨

本文介绍了学术期刊出版模式的重大变革：先还原了传统的匿名同行评审出版流程，再指出互联网普及与科研资助机构的施压，正推动科研成果免费获取成为现实；最后详细拆解了当前涌现的三种核心在线出版商业模式，并点明其对传统同行评审体系的潜在冲击。

英文主旨

This article introduces the significant transformation of academic journal publishing models. It first restores the traditional anonymous peer-review publishing process, then points out that the popularization of the Internet and pressure from research funding agencies are making free access to scientific research results a reality. Finally, it elaborates on the three core emerging online publishing business models and clarifies their potential impact on the traditional peer-review system.

 - 句子主干：It signals a change.
 - 介词短语定语：in what has... been a key element of scientific endeavour 修饰 change
 - 宾语从句：what has, until now, been a key element of scientific endeavour 作介词 in 的宾语
 - 时间插入语：until now 作时间状语
- 翻译：它标志着，迄今为止一直是科学事业核心要素的某个方面正在发生改变。
- 常考词汇短语：
 - signal /'sɪgnəl/ v. 标志着，表明；发信号 n. 信号，标志
 - key element 核心要素
 - scientific endeavour 科学事业
 - until now 迄今为止

第三段

1. The value of knowledge and the return on the public investment in research depends, in part, upon wide distribution and ready access.

- 翻译：知识的价值以及公共科研投资的回报，在一定程度上取决于其广泛的传播和便捷的获取。
- 常考词汇短语：
 - value /'vælju:/ n. 价值；重要性 v. 重视，珍视
 - return on investment 投资回报
 - public investment 公共投资
 - in part 在一定程度上，部分地
 - depend upon 取决于，依靠 (=depend on)
 - distribution /,dɪstrɪ'bju:ʃn/ n. 传播，分布；分配
 - ready access 便捷获取

2. It is big business.

- 翻译：这是一门大生意。
- 常考词汇短语：
 - big business 大生意，大型产业

3. In America, the core scientific publishing market is estimated at between 7billionand 11 billion.

- 翻译：在美国，核心科学出版市场的规模估计在70亿到110亿美元之间。

5. There is open-access publishing, typically supported by asking the author (or his employer) to pay for the paper to be published.

- 翻译：第二种是开放获取出版模式，其运营资金通常来自向论文作者（或其所属机构）收取的论文发表费。
- 常考词汇短语：
 - open-access publishing 开放获取出版
 - typically /'tɪpɪkli/ adv. 通常，典型地
 - support /sə'pɔ:rt/ v. 支持，支撑；资助 n. 支持，资助
 - employer /ɪm'plɔɪər/ n. 雇主，用人单位

6. Finally, there are open-access archives, where organizations such as universities or international laboratories support institutional repositories.

○ 长难句分析:

- 句子主干: there are open-access archives.
- 定语从句: where organizations... support institutional repositories 修饰先行词 open-access archives
- 举例状语: such as universities or international laboratories 对 organizations 进行举例说明

○ 翻译: 最后一种是开放获取档案库模式, 由大学或国际实验室这类机构支持建立机构知识库。

○ 常考词汇短语:

- finally /'faɪnəli/ adv. 最后, 最终
- archive /'ɑ:rkai/ n. 档案库, 档案馆 v. 存档
- organization /ɔ:rgənai'zeɪʃn/ n. 组织, 机构
- laboratory /'ləbrətɔ:ri/ n. 实验室
- institutional repository 机构知识库

7. Other models exist that are hybrids of these three, such as delayed open-access, where journals allow only subscribers to read a paper for the first six months, before making it freely available to everyone who wishes to see it.

○ 长难句分析:

- 句子主干: Other models exist.
- 后置定语从句1: that are hybrids of these three 修饰先行词 models, 因谓语 exist 较短, 为避免头重脚轻将从句后置
- 举例状语: such as delayed open-access 对 other models 进行举例
- 定语从句2: where journals allow only subscribers to read a paper... 修饰先行词 delayed open-access
- 时间状语: before making it freely available to everyone...
- 定语从句3: who wishes to see it 修饰先行词 everyone

○ 翻译: 还存在其他融合了这三种模式的混合模式, 例如延迟开放获取模式: 期刊在前六个月只允许订阅者阅读论文, 之后再将其免费开放给所有想要阅读的人。

○ 常考词汇短语:

- hybrid /'haɪbrɪd/ n. 混合体, 混合物; 杂交种
- delayed open-access 延迟开放获取

- available /ə'veɪləbl/ adj. 可获得的, 可使用的; 有空的
- make sth. available to sb. 使某物对某人可用/可获得
- wish to do sth. 想要做某事

8. All this could change the traditional form of the peer-review process, at least for the publication of papers.

○ 翻译: 所有这些都可能会改变传统的同行评审流程模式, 至少在论文发表方面是如此。

○ 常考词汇短语:

- traditional /trə'dɪʃənəl/ adj. 传统的
- form /fɔ:rm/ n. 形式, 形态; 表格 v. 形成, 构成
- process /'prɒ:səs/ n. 过程, 流程; 工序 v. 加工, 处理
- at least 至少

三、完整原文

It used to be so straightforward. A team of researchers working together in the laboratory would submit the results of their research to a journal. A journal editor would then remove the authors' names and affiliations from the paper and send it to their peers for review. Depending on the comments received, the editor would accept the paper for publication or decline it. Copyright rested with the journal publisher, and researchers seeking knowledge of the results would have to subscribe to the journal.

No longer. The Internet - and pressure from funding agencies, who are questioning why commercial publishers are making money from government-funded research by restricting access to it - is making free access to scientific results a reality. The Organization for Economic Co-operation and Development (OECD) has just issued a report describing the far-reaching consequences of this. The report, by John Houghton of Victoria University in Australia and Graham Vickery of the OECD, makes heavy reading for publishers who have, so far, made handsome profits. But it goes further than that. It signals a change in what has, until now, been a key element of scientific endeavour.

The value of knowledge and the return on the public investment in research depends, in part, upon wide distribution and ready access. It is big business. In America, the core scientific publishing market is estimated at between *7billionand*11 billion. The International Association of Scientific, Technical and Medical Publishers says that there are more than 2,000 publishers worldwide specializing in these subjects. They publish more than 1.2 million articles each year in some 16,000 journals.

This is now changing. According to the OECD report, some 75% of scholarly journals are now online. Entirely new business models are emerging; three main ones were identified by the report's authors. There is the so-called big deal, where institutional subscribers pay for access to a collection of online journal titles through site-licensing agreements. There is open-access publishing, typically supported by asking the author (or his employer) to pay for the paper to be published. Finally, there are open-access archives, where organizations such as universities or international laboratories support institutional repositories. Other models exist that are hybrids of these three, such as delayed open-access, where journals allow only subscribers to read a paper for the first six months, before making it freely available to everyone who wishes to see it. All this could change the traditional form of the peer-review process, at least for the publication of papers.
